

What Professionals Are Saying About BrainBuilder®

"We have been training memory skills for our students (children and adults) for the past thirty-three years. BrainBuilder is the first program we have found that provides the practice with an intensity that makes a difference! We encourage our clients to purchase a copy for practice at home. This helps them increase their processing skills rapidly and improves their memory. The program is well structured so that parents can help their children at home and adults can work on their own to increase memory skills. The results we are seeing are truly impressive! Thanks!"

Melvin-Smith Learning Center/EDU-Therapeutics
Licensed Educational Psychologist
Licensed Speech Pathologist

"All of the children that we evaluate for an individual educational plan are placed on BrainBuilder. That includes children that are just "normal", children that are gifted and children that have various types of processing problems. Some of these children are very severe.

Every one of the children that do the program as prescribed and are diligent about it make very significant progress. This is reflected in re-testing. The progress is shown in higher IQs, higher scores in spelling and greater abilities to comprehend what they have read."

Paul Cates, Ph.D.

President
FCM-Faith Christian Ministries

"BrainBuilder is a phenomenal product. My background in educational psychology has provided me with a keen understanding of the role of sequential processing in learning. My experience as a teacher at all levels from pre-school to graduate school has alerted me to the fact that solutions in the area of cognitive processing are well-needed. BrainBuilder provides necessary training in the areas of attention, concentration and the capacity of the working memory that I have never seen before in a computer application. Kudos for addressing an area of human development that has been ignored for too long."

John K. Davis, Ph.D.

Assistant Professor of Education
California State University, Dominguez Hills

"Thanks for creating BrainBuilder.

In my research into enhancing peak performance of executives and sales people, your software has been invaluable in measuring progress, enhancing memory skills, improving executive functioning, and reducing reactions times. My research subjects progressed further and more quickly when they used BrainBuilder."

Sincerely,

John F. Gilbert, Ph.D.
